**NOT FOR RELEASE UNTIL MARCH 15, 2012**

**New Product Press Release  
March 15, 2012**

**RemoteMix One™ - Field Interview Tool**

JK Audio combines professional audio electronics with a flexible communications interface in a rugged new belt pack design.

RemoteMix One™ allows live man-on-the-street interviews through your cell phone. Provides a professional look and feel to field reporters and live remote talent.

RemoteMix One™ provides two-way IFB connections through a cell phone or notebook for truly flexible remote monitoring.

RemoteMix One™ connects to cell phones and notebooks through the wired headset jack. This professional microphone preamp and powerful headphone amplifier provide a vast improvement in sound quality. A 3.5 mm stereo line input jack allows recordings to be mixed into the broadcast. The 3.5 mm stereo line output jack provides your full bandwidth microphone signal on the left channel and the return audio on the right channel.

The stereo headphone output gives you a mix of the XLR microphone input, 3.5 mm input, and return audio. This powerful ½ watt stereo headphone amplifier will cut through any crowd noise.

Use as a headset replacement for normal voice calls, or transmit full bandwidth audio using third party CODEC apps. Replaceable interface cables connect to most phones and notebooks.

Features:

- XLR Mic Input
- Mic Mute switch
- 3.5 mm Stereo line input and output
- ¼" Stereo Headphone Jack
- 3 conductor 2.5 mm headset interface (most legacy phones)
- 4 conductor 3.5 mm headset interface (iPhone, most Android phones & notebooks)
- >20 Hours on one 9 Volt Alkaline Battery
- Size: 4.7" x 3.75" x 1.65" (12 x 9.5 x 4.2 cm)
- Weight 10 ounces

Available May 2012 through authorized dealers.
